MATERIAL SAFETY DATA SHEET

Date of issue: January 2006

Note:
This product is not classified as hazardous.
This product is an explosive product classified as Class 1.1D Dangerous Good.

1.0 PRODUCT AND COMPANY IDENTIFICATION

Product name: ANFO
General name: ANFO
General description: Ammonium Nitrate Fuel Oil
Product use: The product is a blend of 94% low density ammonium nitrate porous prills and 6% diesel fuel oil. The product is dry and free flowing.

The product is booster sensitive and is used as the main charge in dry blast hole conditions.

Company Name: Tenaga Kimia Sdn. Bhd.
Company Address: No. 8, Jalan SS 22/21, Damansara Jaya, 47400 Petaling Jaya, Selangor, Malaysia.
Emergency Tel: +60 3 6035 2801
Telephone Number: +60 3 7729 7464
Fax: +60 3 7729 8383

3.0 HAZARDS IDENTIFICATION

This material is hazardous. Risk of explosion by friction, impact, supersonic shock, heat, flame or other ignition sources, especially under confinement.

Health hazard

Acute-ingestion: May cause abdominal discomfort, pain, diarrhoea, vomiting and nausea.

Acute-eye: May cause discomfort and impairment of vision.

Acute-skin: May cause discomfort and rash for sensitive skin.

Acute-inhalation: May cause nausea, giddiness, tiredness.

Other info: None of the components of this material are listed as a carcinogen by OSHA.

Other health hazard information

None established.

4.0 FIRST AID MEASURES

Ingestion: Do not induce vomiting. Rinse mouth and drink one glass of water. If vomited, lower head below hips to prevent breathing in the vomit matter. Do not attempt to give liquid to an unconscious person. Seek medical attention.

Eye: Flush with copious amount of running water for a minimum of 15 minutes. Eyelids should be held open to ensure a thorough rinsing. If irritation persists, seek medical attention.

Skin: Remove contaminated clothing immediately. Wash affected area with soap and copious amount of water. If irritation persists, seek medical attention.

Inhalation: Remove patient to fresh air. Allow patient to rest in a comfortable position until fully recovered. Administer artificial resuscitation if not breathing. If symptom persists, seek medical attention.

Advice to doctor: Treat symptomatically.
5.0 FIRE FIGHTING MEASURES

It is unlikely to be a fire hazard under normal conditions. However, it will explode if suitably primed. For small fire, a fire extinguisher can be used or a heavy dousing of water is effective. For big fire, the area should be isolated and all personnel should be evacuated to a safe distance. Toxic fumes may be generated as the product decomposes.

6.0 ACCIDENTAL RELEASE MEASURES

Spill release

Evacuate area of all non-essential personnel. Eliminate all ignition sources. Contain the source and spread of the spill. Make sure the spilt material does not enter any waterways or drains.

Spilt material should be scooped and placed in clean, approved containers, which are then labelled and sealed. All residues should be scraped up for disposal if possible. Inert absorbent material such as sand should be spread over the area.

7.0 STORAGE AND HANDLING

Store in a clean, dry, cool and well-ventilated magazine, in accordance with the local, state and federal laws and regulations. Store away from all ignition sources such as heat, flame and spark. Store away from alkalis, acids, nitrites, chlorates, chlorides and permanganates.

It should only be used by or under guidance of trained personnel. Avoid contact with skin and eye and breath in vapor.

8.0 EXPOSURE CONTROLS & PERSONAL PROTECTION

Engineering controls

Use in well-ventilated area.

Personal protective equipment

Respirator

Not required according to the conditions of use.

Eye protection

Safety goggles if eye contact is likely.

Protective clothing

Protective clothing if splash is likely.

Glove

Impervious rubber gloves if contact with product is likely.

Flammability

Fire hazards

Product is combustible. All ignition sources should be eliminated.

9.0 PHYSICAL AND CHEMICAL PROPERTIES

Appearance

Small, solid, white particles, or coloured with red for identification, feels oily on touch.

Melting point

Not applicable

Boiling point

Not applicable

Vapour pressure

Not applicable
Specific gravity 0.8 – 0.9 g/cc
Flash point Not applicable
Flammability limit Not applicable
Solubility in water Soluble
Other properties None established

10.0 STABILITY AND REACTIVITY DATA
Stability Explosive material. It may explode when subjected to supersonic shock, burning, strong energy, fire, or heavy impact, particularly when under confinement.
Conditions to Avoid Avoid contact with fire, heat and strong shock or impact, all ignition sources.
Materials to Avoid Avoid corrosives chemicals (e.g. strong acids or strong alkalis), oxidizing material, metal powder, combustible material, inorganic nitrite.
Hazardous Decomposition Products Nitrogen Oxides (NO\textsubscript{X}), Carbon Monoxide (CO)
Hazardous Polymerization Will not occur

11.0 TOXICOLOGY INFORMATION
Toxic fumes nitrogen oxides and carbon monoxide can be released on detonation and fire.

Nitrogen oxides vapour is reddish brown with acrid suffocating odour. It is poisonous, oxidising and corrosive. It may cause severe eye, skin, and mucous membrane irritation or corrosive burns. Inhalation may cause severe irritation, chemical pneumonitis and pulmonary edema. Prompt medical attention is mandatory in all cases of over exposure.

Carbon monoxide is an odourless, colourless, highly flammable and poisonous gas. Carbon monoxide acts as a chemical asphyxiant binding to the blood haemoglobin, greatly reducing the red blood cells’ ability to transport oxygen to body tissues. Effects may include headaches, dizziness, convulsions, loss of consciousness and death.

12.0 ECOLOGICAL INFORMATION
Prevent contamination of waterways. Poisonous to aquatic organisms.

13.0 DISPOSAL CONSIDERATION
Waste material should be returned to supplier or disposed in blast holes by qualified personnel. Do not put remainders in a bin or to the dumping.

14.0 TRANSPORT INFORMATION
Classified as Class 1 Dangerous Goods. Transport in accordance with the local, state and federal laws and regulations.
Shipping name: Explosive, blasting, type B

General description: Ammonium Nitrate Fuel Oil

UN Classification: 1.1D

UN Number: 0082

Hazchem code: E

Poisons schedule: Not scheduled

15.0 REGULATORY INFORMATION

Classification: This material is classified as hazardous. It is the category of harmful.

Risk Phrase: Risk of explosion by shock, fire or other sources of ignition

Safety Phrase: Keep and store away from combustible material. No smoking. Prevent contact with skin and eyes. Rinse immediately with water and seek medical advice in case of contact with eyes. Wear suitable gloves and eye & face protection.

Poisons Schedule: Not scheduled.

SARA Title III Information: N/P

Federal Regulatory Information: N/P

State Regulatory Information: N/P
